Workshop Proposal

Advanced Web Designing

Viraj Kadam provides the best and most advanced web designing course to students so that they can become web designing experts.

From responsive web designing to backend development and cloud deployment of projects. Students will be happy and confident with advanced knowledge at end of this workshop.

Advanced, Interactive, and Industry first topics will encourage students to pursue study and practice even after the workshop, encouraging them to lead the industry.

Cloud Computing

Oppose to On-Premise deployment architecture cloud offers more advantages.

Scalability and flexibility are the main advantages of the cloud, and we are going to learn how it's done.

With top global organizations adopting and harnessing the power of the cloud, skilled cloud professionals are in high demand, now more than ever.

Relevance to computer science students

As a computer science student he/she goes through detailed learning of programming concepts, and problem-solving using probability and statistics. Utilizing the same concepts and enhancing their core knowledge is the motive behind this advanced topic.
